What specific question are you aiming to answer? What makes this question interesting to you?

The source of dataset (In case you use other dataset).

Summarize and explore the data.

Methods - Term Frequency–Inverse Document Frequency (TF-IDF)

What analyses are most appropriate to answer the question of interest?
Describe the analyses used.

Methods - Nonnegative Matrix Factorization (NMF)

What analyses are most appropriate to answer the question of interest?
Describe the analyses used.

Methods - Naive Model (Persistence Model)

What analyses are most appropriate to answer the question of interest?
Describe the analyses used.

What analyses are most appropriate to answer the question of interest?
Describe the analyses used.

What analyses are most appropriate to answer the question of interest?
Describe the analyses used.

Present relevant graphics.
Interpret results of the analysis.

Result - Most Important Words Given By Model

Present relevant graphics.

Interpret results of the analysis.

What are your conclusions? The contribution of your team members.
